# 1 ZStack Cloud 4.8.0 (LTS)

On January 10, 2024, ZStack Cloud officially released its Long Term Support (LTS) version, **ZStack Cloud 4.8.0**, covering a number of feature improvement described in detail below.

## Overview

### Volume and Image

1. Optimizes the file name of an exported image by adding a suffix that can indicate the image format.

### Cloud Network

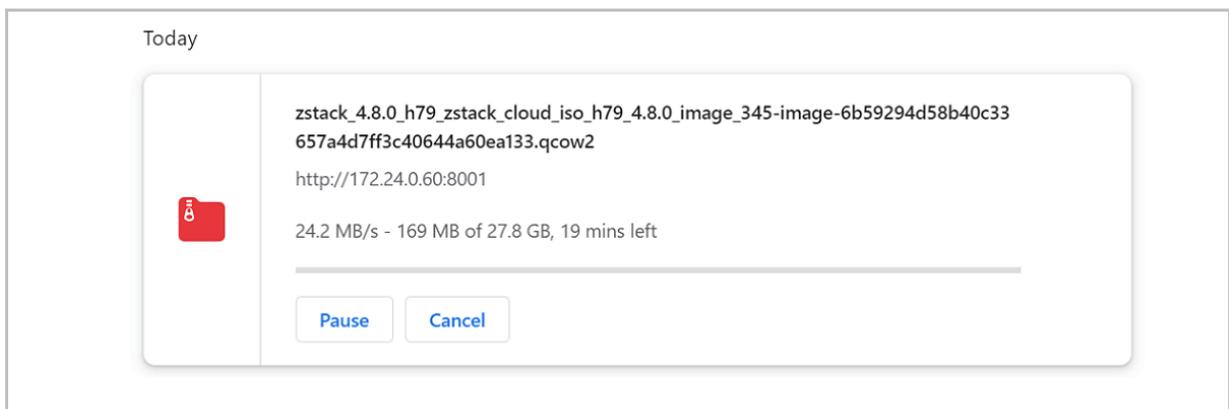

1. Supports VPC vRouter's hot migrations across SharedBlock primary storage.

## 1.1 Volume and Image

### 1.1.1 Optimizes the File Name of an Exported Image by Adding a Suffix that can Indicate the Image Format

Starting from ZStack Cloud 4.8.0, all image file exported from the Cloud contain format suffixes in file names, which helps you easily identify the image file format .

**Figure 1-1: The Name Suffix of an Exported Image File**

## 1.2 Cloud Network

### 1.2.1 Supports VPC vRouter's Hot Migrations across SharedBlock Primary Storage

In previous versions, ZStack Cloud has allowed you to migrate a running VPC vRouter across primary storage of different types, including LocalStorage↔SharedBlock primary storage, LocalStorage↔NFS primary storage, and SharedBlock↔NFS primary storage.

Starting from 4.8.0, you can migrate a running VPC vRouter across primary storage of the same type, currently including SharedBlock↔SharedBlock primary storage, which improves the flexibility of your O&M on VPC vRouters.

## 2 Prior Releases

---

Features and improvements from prior releases of ZStack Cloud are described in the release notes for each release. For more information of the release notes for a prior release, see [Prior Releases](#).
